Election of Claims

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the restriction requirement in the Office Action mailed October 3, 2003, please consider the following remarks.

Applicants respectfully traverse the restriction requirement, and assert Groups I, VI, XI and XVI are sufficiently related as not to unduly burden the Examiner in making a search. The commonality amongst all these groups is the identity of Ar' and that R² and Y are not linked to form a ring. These groups differ in that they have been divided by the Examiner with respect to Ar¹ being either aryl or heteroaryl; and with respect to R¹ and R² as linked to form a ring or not linked to form a ring.

Applicants wish to direct the Examiner's attention to U.S. Patent No. 6,613,805, wherein such a sub-classification of the variables at either end of the molecule was not required for examination. The '805 patent is related to WO 98/38156, reference A2 on Applicants' PTO Form 1449, submitted March 19, 2001. In the '805 patent, the Ar moiety at the left end of the molecule in claim 1 is an aromatic ring which is either homocyclic or heterocyclic. For comparison purposes, in the present claims, Ar¹ is the designation for the variables at the left end of the molecule.

In addition, in claim 1 of the issued patent the variables for the right end of the molecule, R¹ and R², may or may not link to form a ring. For comparison purposes, in the present claims, R¹ and R² also designate the variables at the right end of the molecule. Accordingly, Applicants

assert that the '805 patent provides evidence that the uniting of Groups I, VI, XI and XVI will not be an insurmountable burden to examination.

Applicants respectfully request that the Examiner reconsider this restriction requirement and reunite Groups I, VI, XI and XVI for prosecution in the present application.

Should the Examiner chose to maintain the present grouping of the claims, Applicants hereby elect to prosecute the claims of Group XI and provisionally elect the species represented by the compound of Example 95, 4'-fluoro-N-[6-(1-pyrrolidinylmethyl)-7,8-dihydro-2-naphthalenyl][1,1'-biphenyl]-4-carboxamide illustrated on pages 220 and 221 of the specification. This compound is recited as the eighth species of claim 34.

No amendment of inventorship is necessitated by this election.

Early allowance of the claims is requested. Should the Examiner believe that a conference with Applicants' attorney would advance prosecution of this application, the Examiner is respectfully invited to call Applicants' attorney at the number below.

Respectfully submitted,

Date: November 3, 2003
